

Rapid GenomEra[®] PCR tests

The GenomEra[®] CDX system by Abacus Diagnostica provides a powerful tool for running molecular diagnostics routinely and cost-efficiently without compromising assay reliability and quality. The current GenomEra product portfolio consists of assay kits intended to aid in the diagnosis of CNS, critical and blood stream infections, complemented with a perinatal diagnostic assay.

Product type	CNS Infections	Critical Infections				Blood Stream Infections	Perinatal Diagnostics
